the specification of which

☐ is attached hereto

☒ was filed on March 7, 2000 as reissue application number 09/522,786

☐ and (if applicable) was amended on \_\_\_\_\_

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

We (I) hereby claim foreign priority benefits under 35 USC §119(a)-(d) or §365(b) of any foreign application(s) for patent or inventor's certificate, or §365(a) of any PCT International application which designated at least one country other than the United States, listed below and have also identified below any foreign application for patent or inventor's certificate, or PCT international application having a filing date before that of the application on which priority is claimed. Patented

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all that apply)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described as follows:

US Letters Patent No. 5,793,779, failed to include a combination of features including a diameter less than 140 mm, without a recital of a particular thickness, in combination with providing a table of contents (TOL), and a track pitch in the range between 0.646  $\mu$ m and 1.05  $\mu$ m as recited in allowed Claims 65-66.

A second error upon which reissue is based is that original Claims 1-64 failed to cover more or less than the inventor had a right to claim in the patent. New Claims 65-66 address the first error, and new Claims 65-72 address both errors.

All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.

As a named inventor, I hereby appoint the following attorney(s) and/or agent(s) to prosecute this application and transact all business in the Patent and Trademark Office connected herewith:
